3.2.03. Tag Name: "isto_vdi:serviceprovider_solution"

Scope: System

Applicability: This tag must be applied when AWS workspaces or Azure Virtual Desktop (AVD) or GCP Workbench is provisioned.

Security Background: These instances are workstations and will be out of scope from Vulnerability Scanning (VS) & Server Compliance Checks. To detect and exclude these workstations, use either of the tagging during provisioning.

Applies to:

- AWS Workspaces
- Azure Virtual Desktop (AVD)
- GCP Workbench

Examples (serviceprovider_solution):

1. isto_vdi:aws_vdi
2. isto_vdi:azure_avd
3. azure_vdi
4. isto_vdi:gcp_workbench
